IMPORTANT – The Curriculum Vitae cannot exceed 4 pages. Instructions to fill this document are available in the website.

Part A. PERSONAL INFORMATION

CV date 07/12/2021

First name	JOSÉ ANTONIO		
Family name	SANZ HERRERA		
Gender (*)	MALE	Birth date (dd/mm/yyyy)	
Social Security, Passport, ID number			
e-mail			URL Web
Open Researcher and Contributor ID (ORCID) (*)	0000-0001-8371-3820		

(*) Mandatory

A.1. Current position

Position	Full Professor (Catedrático de Universidad)		
Initial date	21/07/2021		
Institution	Universidad de Sevilla		
Department/Center	Mecánica de Medios Continuos y Teoría de Estructuras	Escuela Técnica Superior de Ingeniería	
Country	Spain		
Key words	Ingeniería mecánica, aeronáutica y naval; Ingeniería civil y arquitectura		

A.2. Previous positions (research activity interruptions, art. 14.2.b))

Period	Position/Institution/Country/Interruption cause
05/12/2017 – 20/07/2021	Profesor Titular / Universidad de Sevilla / Spain
02/12/2010 – 04/12/2017	Profesor Contratado Dr / Universidad de Sevilla / Spain
10/06/2009 – 01/12/2010	Profesor Ayudante Dr / Universidad de Sevilla / Spain
10/06/2008 – 09/06/2009	Profesor Ayudante / Universidad de Sevilla / Spain

A.3. Education

PhD, Licensed, Graduate	University/Country	Year
Doctor Ingeniería Biomédica	Universidad de Zaragoza	2008
Ingeniería Industrial	Universidad de Sevilla	2004

Part B. CV SUMMARY (max. 5000 characters, including spaces)

My research is dedicated to the mathematical modeling and computational simulation of biophysical phenomena and clinical applications at different scales in the field of biomechanics and mechanobiology, modeling and computational simulation of biomaterials, computational mechanics and development of numerical methods in engineering. Along my career I have published 42 JCR research papers, in which 27 are Q1 ranked. My research is regularly published in international journals, including 3 papers in leading journals of their category (impact factor higher than 7). Moreover, I have accumulated more than 1500 citations according to Google Scholar (h-index = 19). My research have been funded both at national level (plan nacional de investigación) and regional level (Junta de Andalucía). In particular, I have participated as a PI in 4 research projects. I have obtained 2 research periods (sexenios de investigación).

Since 2008 I develop an independent and novel research at the School of Engineering of the University of Seville. In particular, my research is classified within the Health and demographic change challenge, and is dedicated to unravel and decipher the role of mechanics in Biology, with an emphasis on analyzing this effect in relevant diseases such as cancer. Indeed, 2 of the last research projects that I led are dedicated to study cancer disease from a completely novel perspective and methodology. I expect that the results we are obtaining in our investigations could potentially benefit the global world health through new treatments, drugs and protocols. Along my career, I have been distinguished with several prizes as the young research Juan Carlos Simo 2013 or the Royal Academy of Sciences of Seville young investigator prize in 2011, amongst others.

Besides the research that I conduct in my group, I have a network of international collaborators. Specifically, I have worked in some prestigious universities such as École Polytechnique (France), MIT (Cambridge MA, USA), Imperial College London (London) and KU Leuven (Belgium). Moreover, in 2011 I earned a visiting professorship position at the University of Colorado at Boulder, dedicated to teach summer courses in the area of Cellular Mechanics.

I have transferred some of my research results to industry and society. In the period 2013-2016 I joined to the research department of structural mechanics of the company Abengoa Research S.L. where I was the responsible of that division (+1M EUR Budget Responsible, +20 Employers under my supervision). Moreover, I have signed I+D+i contracts as a PI with 4 private companies. I won two prizes for best business ideas in the University of Seville. I have obtained 1 transfer period (sexenio de transferencia).

I have supervised 1 doctoral thesis, 3 ongoing doctoral thesis (1 co-supervised with prof. Van Oosterwyck from KU Leuven), and 14 master thesis. Moreover, I have participated in a number of divulgation activities of my research: I have participated in the “Youngs with researchers” programs of the University of Seville, that promotes research and STEM careers among High School students. I have also been the director of summer courses since 2019 at the international University of Andalusia. These courses pursue to bring biomedical engineering studies closer to society, including university students and professionals of different fields of medicine and engineering.

I have edited 1 special issue in a JCR journal and edited 1 book. I have reviewed papers in more than 30 JCR journals. I also regularly review research projects for national (AEI, DKV) and international agencies (CNRS-France, FWO-Belgium). I'm an editorial member of 3 international JCR journals.
